DEHYDRATED PRODUCTS

Banana Powder

Banana powder is formed by using banana pulp, which is mechanically chopped and then processed with [hydraulic shear](#) using a [colloid mill](#), turning it into a paste. [Sodium metabisulfite](#) is then used to brighten the yellow color of the paste. The paste is then dried by either spray- or drum-drying, although the latter is more common because none of the paste is lost while drying. The drum-drying also produces about 2% more powder and also dries it more thoroughly. Regardless of the drying process banana powder can generally only stay fresh on the shelf for about a year before passing its expiration date.

Banana powder, because of its high concentration of banana essence, has been found to be a "major source of carbohydrate and calories". While it is generally low as a source of protein, the beneficial ingredients of the powder are still "markedly superior to that of other fruits".^[8] The powder has also been found to be useful as a general treatment for dyspepsia (indigestion)

Product Name: Dehydrated Garlic (Chopped and Minced)

This Dehydrated Garlic is highly appreciated by our client for their rich taste and purity. These are easily available at very reasonable price in market. The dehydrated garlic is free from any added artificial coloring matter.

Product Detail

- Color : Brownish White
- Ash Content : 5%Max
- Moisture : 5% Max
- Hot Water Insoluble : 20% Max
- Ash : 5% Max
- Acid Insoluble Ash : 0.5% Max

Trade Information

Crop Year	Current Year
Place Of Origin	India
Inspection	SGS or any other third Party Inspection Company for Weight and Quality as per Buyer's requirement.
Packing	20 Kg Poly Bag
Load Ability	15 MT per 20 FT Container

Product Name: Dehydrated pineapple

Our organization is offering Dehydrated Pineapple to our clients. This pineapple is highly demanded in the global market due to its high nutritional value, delicious taste and freshness.

Product Detail

- Color : Red, Orange and Green
- Flavour : Natural Flavor
- Size : 03-05 mm
- Length : 03-05 mm
- Width : 03-05 mm
- Thickness : 03-05 mm

Trade Information

Crop Year	Current Year
Place Of Origin	India
Inspection	SGS or any other third Party Inspection Company for Weight and Quality as per Buyer's requirement.
Packing	12.5 Kg Carton
Load Ability	15 MT per 20 FT Container

Being a respected and reputed processor, we assure high quality standards along with proper selection of superior grade garlic as also with several procedures of shelling, washing, drying, picking, grinding and packaging. Our products are appreciated for their quality assurance and pungency.

Product Name: Ginger powder

Ginger or ginger root is the [rhizome](#) of the plant [Zingiber officinale](#), consumed as a [delicacy](#), [medicine](#), or [spice](#). Ginger produces a hot, fragrant kitchen spice.^[8] Young ginger rhizomes are juicy and fleshy with a very mild taste. They are often [pickled](#) in [vinegar](#) or [sherry](#) as a snack or just cooked as an ingredient in many dishes. They can also be [steeped](#) in boiling water to make ginger tea, to which [honey](#) is often added; sliced orange or lemon fruit may also be added. Ginger can also be made into candy, or [ginger wine](#) which has been made commercially since 1740.

Mature ginger rhizomes are [fibrous](#) and nearly dry. The juice from ginger roots is often used as a spice in [Indian recipes](#), and is a common ingredient of [Chinese](#), [Korean](#), [Japanese](#), [Vietnamese](#) and many South Asian cuisines for [flavoring](#) dishes such as seafood, various meats and [vegetarian cuisine](#).

Fresh ginger can be substituted for ground ginger at a ratio of 6 to 1, although the flavors of fresh and dried ginger are somewhat different. Powdered dry ginger root is typically used as a flavoring for recipes such as [gingerbread](#), [cookies](#), [crackers](#) and cakes, [ginger ale](#), and [ginger beer](#).

Candied ginger, or crystallized ginger, is the root cooked in sugar until soft, and is a type of [confectionery](#).

Fresh ginger may be peeled before eating. For longer-term storage, the ginger can be placed in a plastic bag and refrigerated or frozen.
